I'm a Student of UAL currently in my second year studying BA Animation, specialising in 2D digital and traditional Animation Arts. My passion comes from creating original characters and environments, through drawings and written stories.

With my experience and education in character design, my main goal would be to develop and create my own animated tv show towards a teen/young adult target audience. With my goals in mind, I aim to be proactive, engaged and focused in learning about the creative industry in a professional way.
